EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Hui C. Wauters on July 1, 2009.

The application has been amended as follows:

In the claims:

In claim 1, line 3, delete "isothiahaphthene" and substitute therefor

-- isothianaphthene --.

In claim 6, sixth line from the bottom after "selected from", insert

-- the group consisting of --.

Cancel claims 10-12, 17, and 18.

In the Abstract:

Delete the Abstract and substitute therefor:

The invention relates to a self-doping type electrically conducting polymer comprising an isothianaphthene or thiophene skeleton where the polymer chains are crosslinked preferably through a sulfone bond which is imparted with water resistance and solvent resistance; a production process thereof; an electrically conducting composition film obtained by coating a composition containing the self-doping type electrically conducting polymer on a substrate and heating it; a product coated using the composition; and an electronic device containing the self-doping type electrically conducting polymer.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The applicants' Amendments and Remarks filed April 10, 2009 have been duly considered, along with the Fax received June 30, 2009, the July 1, 2009. Interview Summaries, and all other documents of record in this application. The Obviousness-type Double Patenting rejection is rendered moot by the fact that the present application is allowed before the other one. The prior art does not teach or suggest a self-doping polymer as claimed with cross-linking through a sulfone bond.

The Abstract has been amended by the examiner to bring it into compliance with US practice. See MPEP 608.01(b). The chemical drawings are removed but the text of the Abstract remains the same except for deletion of "as represented by formula (2) or (5) below,". Authorization is presumed because of the perfunctory nature of this amendment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
